

Do you have young children and live in Elwood or South Melbourne?

We want to talk to small groups of parents and children in your area about what it is like to live in your neighbourhood

We would love to hear from you!

Are you a parent or primary caregiver of a child aged 0-8 years? Is your child aged 4-8 years? Has your family lived in the area for at least 6 months?

What's involved in the small group discussions?

- Parents: mapping activity survey, focus group.
- Kids: mapping activity survey, drawing activity.

How long will it take and where will it be held?

- One-hour face-to-face group discussion at a venue in your local area.
- Light refreshments provided.
- \$50 voucher per family on completion of the mapping activity survey.

About this research

RMIT University researchers are studying what makes neighbourhoods good for young families and children. We are going to four different suburbs across Melbourne to talk to young children and their primary caregivers. The project is funded by VicHealth.
